

Laser Vision Provider Checklist

The decision to have laser vision correction is an important one that you should make carefully, not quickly. Choose a practice that focuses on safety, diagnostic technology, post-operative follow-up and has a surgeon with experience. We hope you'll choose Cullom Eye & Laser Center as your provider, but if you're shopping around, use this checklist to compare.

	Yes	No
Does the surgeon (not the center) perform at least 500 LASIK procedures per year?	_____	_____
Does the center have its own laser (non-mobile) and are they responsible for its maintenance and calibration?	_____	_____
Does the center use the latest technology such as the VISX Star S3 with the WavePrint diagnostic system?	_____	_____
Does the surgeon use powerless gloves? (Many doctors wear no gloves to save money.)	_____	_____
Does the center sterilize all the instruments for each eye?	_____	_____
Does the center use wavefront analysis to take measurements of the eye pre-operatively?	_____	_____
Does the surgeon personally evaluate each patient prior to surgery?	_____	_____
Does the center take the time to explain complex issues such as monovision and presbyopia and how they will affect your vision after age 40?	_____	_____
If indicated, does the practice perform tests for dry eye before the procedure?	_____	_____
Does the center offer free enhancements for a year after the procedure?	_____	_____
